Skills

- **Languages**: SQL, C++, Java, Python
- **Frameworks**: NumPy, Pandas, Matplotlib, Seaborn, HTML, CSS
- **Tools/Platforms**: Power BI, MS Excel, GitHub, Jupiter Notebook, VS Code
- **Core Technical Skills**: Operating System and Computer Networks
- **Soft Skills:** Problem-Solving, Communication, Teamwork, Decision Making

Projects

Kids in Motion – Playground Programming Data Dashboard | GitHub April 2025

- Analyzed Kids in Motion playground program data and identify attendance trends and participation patterns across different time periods.
- Performed EDA across yearly, monthly, and weekday participation to uncover behavioral and seasonal patterns.
- Highlighted key insights including total yearly attendance, program duration impact, and average attendance by weekday.

Tech used: Python, Pandas, NumPy, Matplotlib, Seaborn

Video Games Sales Dashboard Using MS Excel | LinkedIn April 2025

- Studied global video game sales to uncover trends across genres, platforms, and regions, focusing on understanding market behavior and performance patterns.
- Built an interactive Excel dashboard using Pivot Tables and dynamic charts to clearly visualize sales, genres, platforms, and regional insights.
- Identified top-selling games, major market contributors, and high-performing platforms while highlighting genre and regional performance trends for better decision-making.

Tech used: MS Excel, Pivot Tables, Charts, Data Visualization, Data Analysis

Summer Training

Basics of DSA using C++ | Certificate July 2025
Lovely Professional University

- Created an AI-assisted system to monitor online and offline exams in real time, focusing on improving supervision and ensuring fairness in the assessment process.
- Integrated facial recognition and motion detection to identify students and flag suspicious behavior, providing real-time monitoring and automated alerts for invigilators.
- Strengthened exam integrity by reducing malpractice through continuous AI-based supervision, enabling invigilators to manage multiple exams efficiently via a centralized dashboard.

Tech used: DSA using C++

Certificates

- Chat-GPT-4 Prompt Engineering ChatGPT: Generative AI&LLM | Infosys August 2025
- Cloud Computing Certification (IIT Kharagpur) by NPTEL | NPTEL April 2025
- Fundamentals of Network Communication and Operating System by Coursera | Coursera September 2024
- Code-A-Haunt 24-hour Hackathon organized by coding blocks LPU | Certificate March 2024

Extra-Curricular Activities

- Conducted patent-focused research on an AI-based code debugger, exploring innovative solutions to improve automated error detection and correction | GitHub April 2025
- Completed a 40-hour community development project under Sri Annapurna Charitable Trust NGO supervision | Certificate July 2024

Education

- **Lovely Professional University.** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 6.98*** *August 2023 - Present*
- **Narayana Intermediate College** Kuntloor, Telangana
  Intermediate; ***Percentage: 97*** *April 2022– March 2023*
- **City Talent High School** Suryapet, Telangana
  Matriculation; ***Percentage: 100*** *April 2020 – March 2021*
